### Pikom to lead delegates at ICT summit

THE National ICT Association of Malaysia (Pikom) will lead delegates from both private and public sectors to the 21st World Congress of Information Technology, and Asian-Oceanian Computing Industry Organisation (ASOCIO) ICT Summit in Taiwan.

In a statement, Pikom said ASOCIO will launch their inaugural research report titled "Reimagining the Digital Era".

"The summit offers a platform for the government and industry representatives to share knowledge and experience, develop closer business ties and more importantly, identify new-business opportunities," ASOCIO chairman David Wong said.

Pikom said the representatives will learn about emerging-market trends and technologies, as well as network with global industry players at these events, which will be held simultaneously from Sept 10-14, at the Taipei International Convention Centre. — *by*
